

Empire Equipment Hire Pty Ltd

Goliath 70t Industrial Lifter

Empire Equipment Hire is now pleased to offer customers an Industrial Lifter unique in Australia in design and capacity.

The machine was purposely built to deliver an important project in 2017, part of which involved the transport of 2x 70T Diesel Gensets into the existing power-house of a small and remote island in the Pacific Ocean.

The inability to use conventional lifting and transport equipment on the island has led to the opportunity for the creation of a bespoke solution, that can do the job safely and successfully where other machines can't.

The 70T Industrial Lifter has been designed with the flexibility to lift standard 20` and 40` sea containers, as well as a variety of plant and machineries, boats and can be easily adapted to any project requirement.

Technical Features:

- Nominal capacity: 70.000 kg
- Tare Weight: 15.000 kg
- Gross Weight: 85.000 kg
- Dimensions: 13.2m (+2.3m extension)
X 4.3m (+0.8 extension) X 1.2m
(+0.32 lifting)
- Grade ability: 14%
- Max Speed: 2-5 Km/h
- Fuel: Diesel
- Power: 61kW
- Radio controlled
- 20` and 40` standard containers
